

## Clean Energy Tax-Exempt Financing Program

### Value Proposition

CleanView Capital's Clean Energy Tax-Exempt Financing Program provides eligible entities with greater overall value from clean energy equipment than the limited cost savings offered by decades-long power purchase agreements, and a financing process that is quick and uncomplicated.

### Eligible Energy Equipment

Solar PV & thermal, wind turbines, energy storage, electric generation & cogeneration systems, lighting upgrades, and EV charging stations qualify separately or in any combination, including energy management software and controls for a fully integrated microgrid. The program is available to eligible tax-exempt organizations nationwide for transactions ranging from **\$100,000 to \$5 million**.

### Eligible Entities

**Municipal, County, and State entities;** *such as*, public schools and universities, water districts, hospitals, nursing homes, gas & electric utilities, airports, energy cooperatives (e.g. community solar), landfills, and municipal housing authorities.

**Non-Governmental:** YMCA and JCC Community Centers, non-profit charter schools, and museums.

### Key Features & Benefits

- 100% financing with no upfront costs.
- Competitive, tax-exempt rates.
- Fully amortizing 5-year lease-purchase agreement, with non-escalating, fixed payments.
- Select from monthly, quarterly, or semi-annual in-advance or in-arrears payments.
- Escrow funding with deferred start of payments.
- Pre-payment options and non-appropriation language provided.
- Customer keeps *all* energy savings for the life of the equipment.
- Customer keeps *all* grants and performance-based incentives, and renewable energy credits.
- Customer selects equipment and obtains manufacturers' warranties.
- Contractor performance bond required.
